

VS Code Markdown Styling Test

This document tests all styling elements implemented in the MD-PDF-MCP converter.

Typography & Text Formatting

Regular Text

This is a standard paragraph with regular text. It should use the base font size of 14px and a line height of 1.6em. The text should be crisp and clear with proper spacing.

Emphasis and Strong

Links

Here's

Headings

Heading 1

Should be 28px (2em) with normal weight and a bottom border

Heading 2

Should be 21px (1.5em) with normal weight

Heading 3

Should be 17.5px (1.25em) with normal weight

Heading 4

Should be 15.4px (1.1em) with normal weight

Heading 5

Should be 14px (same as base) with normal weight

Heading 6

Should be 14px in a lighter gray color

Code Formatting

Inline Code

Use the

Code Blocks

```
```python def hello_world(): """Print a friendly greeting.""" print("Hello from VS Code styling!")
return True
```

### Function call

```
result = hello_world() ```
```

## Block Elements

### Blockquotes

This is a blockquote. It should have VS Code's signature left border and proper padding.

Multiple paragraphs in blockquotes should maintain consistent styling.

### Lists

#### Unordered Lists

#### Ordered Lists

### Tables

Header 1	Header 2	Header 3	----- ----- -----	Cell 1	Cell 2	Cell 3		Cell 4
Cell 5	Cell 6							

## Horizontal Rules

Below the rule

## Extended Elements

Task Lists

Images

## Mixed Content

Here's a blockquote with mixed content: - List item in blockquote - Another item with

```
```python
```

Code block in blockquote
`print("Nested styling test") ````

Final Notes

This document should comprehensively test our PDF generation capabilities. Each element should maintain VS Code's exact styling specifications.
